Dear Children,

It’s holiday time once again! The time we all look forward to. And Summer vacations? Enjoy and let vacations mean the following.

V – Visit new places
A – Adhere to your routine
C – Create magic with your little fingers
A – Add new words to your vocabulary daily
T – Try out innovative hobbies
I – Increase your stamina with healthy food & regular exercise
O – Offer help to those in need
N – Nurture feelings of and affection for all
S – Spread happiness

Here are some activities to keep you occupied, especially during the day, when it is too hot to go outside.

Be a Nature Lover
- Identify the trees and plants in your neighbourhood. Write their names.
- Pluck a leaf from each of them. Dry and paste them in a scrap book. Label them.
- Make a collage of newspaper and magazine clippings related to the environment (animals, plants, pollution)

Be Environment Friendly
- Make a note of the waste generated in your house daily. Keep a record of the bio-degradable and non-biodegradable waste in your scrap book.
- Make a colourful poster of size 15 inches × 12 inches with a caption to encourage better methods of waste disposal in your neighbourhood.

Be Imaginative
- We are good at imagining things. Why not put it to use and write beautiful poems on – Trees, Mother, My Friend, Nature or any other topic of your choice?
- Read books – Hardy Boys, Harry Potter, Enid Blyton, Heidi
- Select your favourite character from any of these books and write a character sketch with a drawing on a drawing sheet.
- Showcase your drawing skills by making 2 birthday cards. Leave the inside blank.

Have Fun with Numbers
- Complete the magic circle by filling in the numbers from 1 to 9. Use each number only once. The numbers in each line must add up to 15
- Magic square – The three numbers in each line must add up to 12. Make at least 4 more magic circles/squares and solve.

- Draw 5 figures using scale and pencil only. Count the number of line segments in each figure.

- Using a compass (rounder) make five designs and colour them.

- Revise Maths everyday. Recycle unused pages of your old Maths notebook into a practice notebook and do six sums in this notebook every day.

**Be Innovative**

Imagine that you are the owner of an ice-cream factory. Make a catchy poster advertisement for your ice cream. Do keep in mind – the name of your ice cream, ingredients, taste, price etc.

Enjoy all the activities and come back refreshed and rejuvenated.
